CYBER SECURITY STUDENT

EDUCATION

- **Spokane Valley Tech** —
Spokane Valley, WA
- High School Diploma Candidate
(Expected Graduation: June 2028)
- **Relevant Coursework:**
Network Security Concepts,
Operating System Hardening,
Linux Fundamentals, Hardware
Troubleshooting.

TECHNICAL SKILLS

- **Operating Systems:** Windows,
Linux (Ubuntu/Debian), ChromeOS.
- **Security & Networking:** OS
Hardening, Vulnerability
Identification.
- **Hardware & Systems:** Server
Management, Hardware
Assembly, Component Wiring,
Chromebook Deployment, System
Troubleshooting.
- **Core Competencies:** Team
Collaboration, Technical Problem
Solving, Project Presentation.

PROFESSIONAL SUMMARY

I am a passionate tech student focused on IT systems, secure OS setups, and hardware repair. Through my coursework and national STEM competitions, I have learned how to solve technical problems under pressure and work smoothly in a team. I want to bring my strong work ethic and troubleshooting skills to the summer Chromebook deployment project.

TECHNICAL EXPERIENCES

National Finalist & Grant Recipient

eCybermission Competitions | June 2025

- Engineered and presented a national-level technical solution within a collaborative team environment.
- Secured a STEM in Action grant by demonstrating technical execution, detailed project design, and community impact.

Competitor

CyberPatriot Defense Program | November 2024 - January 2025

- **Hardened** Windows and Linux virtual images by identifying system vulnerabilities and implementing strict user policies.
- Optimized network operating systems and mitigated critical security flaws under strict competitive constraints.

Team Member & Homelab Enthusiast

Robotics Team & Personal Projects | 2024 - Present

- Configured and maintained a dedicated personal homelab server environment to master enterprise computer hardware.
- Assembled, wired, and programmed competitive robotics hardware using precise engineering principles.
